JW Series

The JW family has the most extensive catalogue of models. The modules contain wireless fieldbus communication inserted into the plastic duct which is attached to the shelving. This characteristic allows for addition to or the moving of modules at any time, even when the system is in use.

Characteristics

- Multicolored confirmation button, allowing for the preparation of various simultaneous orders and/or various operators in the same area.
- Straight or 30° angle inclined duct to facilitate visibility and access.
- Possibility of vertically-designed models, ideal for pallets.
- Models with divided display, multi-button LED, upper - lower indicator, etc.
- Operating temperature: -30° C / +50° C.

Elements

- Virtually all of the JW device elements are optional and interchangeable, therefore it is possible to select the model which best suits every possible need.
- Main elements, based on model:
 - Possibility of alphanumeric display of 1 to 6 digits.
 - Quantity correcting keys.
 - Configurable function key.
 - Acoustic signal.
