

pick to light

Your efficiency, our guiding light

SW Series

The differentiating characteristic of the SW series is its reduced size, ideal for small parts picking.

Characteristics

- The modules are stored in a duct, and may be added to or moved at any time.
- This duct may be attachable to flat or tube-shaped structures.
- Operating temperature: -30°C / +50°C.

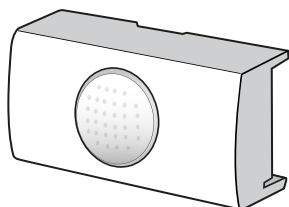

Elements

- The possibility of alphanumeric display and configurable function key.
- Vertically-designed model, ideal for pallets.
- Color options for confirmation button:

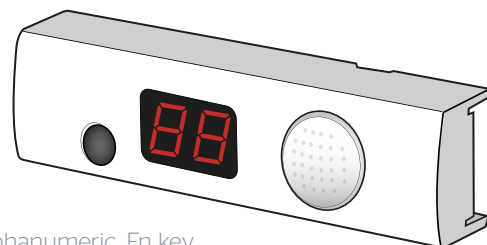

Light modules

SW1001 (R/G/F)

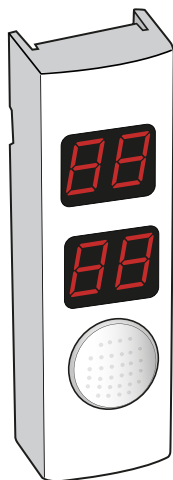

Basic model (no display, no Fn key)
Size (mm): 45 (W) x 27,5 (D) x 24,8 (H)
